

AP Biology after-school review sessions – 2017

All review sessions will **begin in the SCPH** or otherwise announced. Review sessions will begin promptly at 2:50pm and will end by 3:20pm. All students must attend at **least five different** sessions for credit, so by attending five sessions, you'll get 25/25 on a homework assignment. For each different, new, **unique** session you attend, you'll earn two test points for extra credit. Typically, there will be two sessions for each topic, presented in lecture format and including practice and application review. You may not allow others to sign you in for a session – only you can sign in for credit. If you need to leave early (before a session is over, you may not receive credit) – showing up from 2:50-3:00 does not count!

March 27, 28 – Water & Biochemistry – Duehr

March 29, 30 -- Macromolecules (energy and enzymes) – Pelletier

April 3, 4 – Cells – Duehr

April 5, 6 – Cell Division (mitosis & meiosis) – Zedalis

April 10, 11 – Genetics problems – Pelletier

April 12, 13 – Cellular Respiration -- Duehr

April 17, 18 – Photosynthesis – Zedalis

April 19, 20– DNA structure and replication – Pelletier

April 24, 25 – Protein synthesis – Zedalis
